

## ScottMadden Energy Industry Update Reviews Grid Transformation: Paths to the Future Diverge

*Neither Fish Nor Fowl*

**ATLANTA, GA – (May 10, 2016)** – ScottMadden, Inc., one of North America’s leading energy consulting firms, recently released its newest edition of [The Energy Industry Update](#). This semi-annual publication offers our inside view of major events and emerging trends in the energy industry and is received by more than 10,000 industry leaders.

ScottMadden’s Energy Industry Update examines grid transformation and focuses on how paths to the future diverge. As distributed energy resources (DERs) proliferate, different jurisdictions and utilities therein are taking different approaches to adapting the traditional regulatory construct. What are the responses? What are the key questions being asked? What is happening in places like Minnesota and Virginia? Find out in the latest ScottMadden Energy Industry Update [here](#).

“States are experimenting with different approaches to accommodate DER, from both a financial and a regulatory perspective. Responses differ depending upon their existing market structure and whether a commission is comfortable with experimenting through pilot programs and moving regulatory constructs incrementally,” said [Cristin Lyons](#), partner and grid transformation practice leader at ScottMadden.

### **About ScottMadden’s Energy Practice**

We know energy from the ground up. Since 1983, we have been energy consultants. We have served more than 300 clients, including 20 of the top 20 energy utilities. We have performed more than 2,400 projects across every energy utility business unit and every function. We have helped our clients develop strategies, improve operations, reorganize companies, and implement initiatives. Our broad and deep energy utility expertise is not theoretical—it is experience based.

### **About ScottMadden, Inc.**

ScottMadden is the management consulting firm that does what it takes to get it done right. Our practice areas include Energy, Clean Tech & Sustainability, Corporate & Shared Services, and Grid Transformation. We deliver a broad array of consulting services ranging from strategic planning through implementation across many industries, business units, and functions.
