

## ScottMadden to Highlight Organizational Benchmarking Study for Generation and Transmission Staffing

**ATLANTA, GA – (June 13, 2016)** – ScottMadden, Inc., one of North America’s leading energy consulting firms, will soon join top experts as a presenter at the Generation and Transmission (G&T) Accounting and Finance Association’s annual conference being held June 19–22 at The Belmond Charleston Place Hotel in Charleston, SC. This event, hosted by Central Electric Power Cooperative Inc., provides a unique platform to engage with finance and accounting professionals from G&T cooperatives from around the United States to discuss recent events and trends that will have important impacts on the industry.

During this event, [Todd Williams](#), partner and fossil practice co-leader at ScottMadden, and Quentin Watkins, manager at ScottMadden, will highlight a recent organizational benchmarking study for G&T staffing. This study examines staffing levels for non-operational positions, focusing on how many full-time equivalents G&Ts require to complete functional area workload. This exclusive session presentation, for G&T electric cooperative members only, will feature presenters from Georgia Transmission Corporation (GTC) and Old Dominion Electric Cooperative (ODEC) and will review unique considerations, highlight lessons learned, and examine how results were used.

“Workforce strategy continues to be a key strategic concern for G&T cooperatives, and we are excited for the opportunity to share our insights and observations from this unique benchmarking initiative, which was designed to inform that strategy,” said Mr. Williams. “We believe that all G&Ts will benefit from hearing some of the lessons learned from this study,” added Mr. Watkins.

### **About ScottMadden’s Energy Practice**

We know energy from the ground up. Since 1983, we have been energy consultants. We have served more than 300 clients, including 20 of the top 20 energy utilities. We have performed more than 2,400 projects across every energy utility business unit and every function. We have helped our clients develop strategies, improve operations, reorganize companies, and implement initiatives. Our broad and deep energy utility expertise is not theoretical—it is experience based.
