

ScottMadden Examines Challenges and Opportunities for Nuclear Energy in Advanced Outage Management Business Case

“A Business Case for Advanced Outage Management”

ATLANTA, GA – (July 12, 2016) – ScottMadden, Inc., one of North America’s leading energy consulting firms, has released a new article focused on a Business Case Methodology (BCM), a guide for utilities drawing up a business case to adopt emerging digital technology. [The article](#), featured in the [July 2016 issue of the Nuclear Energy Insider newsletter](#), reviews the challenges and benefits for enhancing nuclear power plant performance through digitized processes.

“The application of these advanced outage management technologies will significantly reduce the number of resources needed during an outage to oversee and status work performed in the field,” said [Sean Lawrie](#), partner at ScottMadden.

ScottMadden’s nuclear generation practice focuses on business and cost management, peer-to-peer benchmarking, organization structure and staffing, and plant turnaround and improvement. For more information about the BCM study or applying digital technologies to work processes, please [contact us](#).

About Nuclear Energy Insider

Nuclear Energy Insider, founded in 2010, is a leading provider of business intelligence to the nuclear energy community. We create original content which is received by over 25,000 professionals globally on the highest priority issues facing the industry.
