

ScottMadden Shares Lessons Learned from the Nuclear Generator and Supplier Executive Summit

ATLANTA, GA – (July 27, 2016) – ScottMadden, Inc., one of North America’s leading energy consulting firms, recently sponsored the 22nd Annual Nuclear Generator and Supplier Executive Summit where industry leaders reviewed the challenges facing the nuclear generation sector in today’s demanding environment.

“The USA fleet delivered another great conference, offering a unique platform to engage with leaders from the member plants,” said Jordan Gillis, director at ScottMadden. “As shared during the event, the industry is acutely aware of the challenges it faces and has several initiatives underway to address them—notably the continued strengthening of the USA fleet CFAMs and the support of Delivering the Nuclear Promise. ScottMadden has assisted many nuclear clients to make improvements in these areas, and we look forward to continuing to help the industry evolve and meet challenges head on.”

For additional information, please refer to our [Nuclear Plant Recovery series](#). This six-part series includes articles, case studies, and white papers focused on leading practices in nuclear plant recovery.

About ScottMadden’s Energy Practice

We know energy from the ground up. Since 1983, we have been energy consultants. We have served more than 300 clients, including 20 of the top 20 energy utilities. We have performed more than 2,400 projects across every energy utility business unit and every function. We have helped our clients develop strategies, improve operations, reorganize companies, and implement initiatives. Our broad and deep energy utility expertise is not theoretical—it is experience based.
