

ScottMadden Reviews Demand Response at National Town Meeting

ATLANTA, GA – (August 17, 2016) – ScottMadden, Inc., one of North America’s leading energy consulting firms, recently presented at The National Town Meeting on Demand Response and Smart Grid in Washington, DC. This event, hosted by the Smart Electric Power Alliance (SEPA), explored the latest trends, issues, and business developments for demand response and its enabling technologies and applications.

Chris Vlahoplus, partner and clean tech & sustainability practice leader at ScottMadden, served as a panelist for a roundtable session focused on SEPA’s 51st State initiative, which seeks to find new frameworks that provide a platform for equitable deployment of distributed energy resources (DERs).

“The 51st State initiative has been a valuable exercise by challenging participants to create tangible roadmaps to navigate the transition to a future with higher penetration of DERs,” said Mr. Vlahoplus.

Additionally, Cristin Lyons, partner and grid transformation practice leader at ScottMadden, moderated a breakout session on emerging models and markets for policy and regulatory evolution. This session examined how a variety of proceedings have unfolded and explained the variety of approaches and conversations occurring nationwide.

About ScottMadden’s Energy Practice

We know energy from the ground up. Since 1983, we have been energy consultants. We have served more than 300 clients, including 20 of the top 20 energy utilities. We have performed more than 2,400 projects across every energy utility business unit and every function. We have helped our clients develop strategies, improve operations, reorganize companies, and implement initiatives. Our broad and deep energy utility expertise is not theoretical—it is experience based.

About ScottMadden, Inc.
