

## **ScottMadden and Ontario Power Generation to Share Breakthrough Approach to Improving Nuclear Parts Availability at the ANS Utility Working Conference**

**ATLANTA, GA – (August 16, 2016)** – ScottMadden, Inc., one of North America’s leading energy consulting firms, is proud to join industry leaders as a presenter at the American Nuclear Society’s annual Utility Working Conference (UWC) and Vendor Technology Expo. The conference, being held August 14–17 at the Omni Amelia Island Plantation in Amelia Island, Florida, provides an opportunity to learn best practices and share real-world experiences with experts from across the nuclear industry.

Marc Miller, partner at ScottMadden, will join Frank Guglielmi, vice president of fleet operations and maintenance at Ontario Power Generation (OPG), to offer perspective on how one of the largest nuclear operators in North America used a breakthrough approach to address longstanding issues with parts availability. Jordan Gillis, director at ScottMadden, will serve as the session organizer.

“The OPG fleet is now well into implementing solutions to improve parts availability and is seeing significant, positive results. I am excited for conference participants to learn from Frank about how OPG has systematically tackled what is a common challenge across the industry,” said Mr. Miller. “We chose to present this at the UWC this year because it really impacts all three strategic focus areas of ‘Delivering the Nuclear Promise.’”

### **About ScottMadden’s Energy Practice**

We know energy from the ground up. Since 1983, we have been energy consultants. We have served more than 300 clients, including 20 of the top 20 energy utilities. We have performed more than 2,400 projects across every energy utility business unit and every function. We have helped our clients develop strategies, improve operations, reorganize companies, and implement initiatives. Our broad and deep energy utility expertise is not theoretical—it is experience based.

### **About ScottMadden, Inc.**
