

ScottMadden Assists Large Energy Provider with Security Program to Align with NIST Cybersecurity Framework

ATLANTA, GA – (October 4, 2016) – ScottMadden, Inc., one of North America’s leading energy consulting firms, recently partnered with a large energy provider to align its security program with the NIST Cybersecurity Framework (CSF). A collaborative approach was used to build consensus and ensure stakeholder engagement and alignment with the changes to the security program.

“The CSF has become the standard for energy industry cybersecurity,” said [Jon Kerner](#), partner and IT practice leader at ScottMadden. “Companies that adopt the framework demonstrate alignment with industry expectations and position their cybersecurity programs in a context that business leaders can understand and engage in.”

ScottMadden has undertaken numerous consulting projects in the management and governance of cybersecurity for energy companies throughout North America. By leveraging industry knowledge, our cybersecurity experts help our clients achieve their cybersecurity goals. [Contact us](#) to learn more.

About ScottMadden’s Corporate & Shared Services

ScottMadden has been a pioneer in corporate and shared services since the practice began decades ago. Our Corporate & Shared Services practice has completed more than 1,300 projects since the early 90s, including hundreds of large, multi-year implementations. Our clients span a variety of industries from entertainment to energy to high tech. Examples of our projects include business case development, shared services design, and shared services build support and implementation.

About ScottMadden’s Energy Practice

We know energy from the ground up. Since 1983, we have been energy consultants. We have served more than 300 clients, including 20 of the top 20 energy utilities. We have performed more than 2,400 projects across every energy utility business unit and every function. We have helped our clients develop strategies, improve operations, reorganize companies, and implement initiatives. Our broad and deep energy utility expertise is not theoretical—it is experience based.
