

ScottMadden Provides Approach to Fossil Fleet Performance Benchmarking

ATLANTA, GA – (November 9, 2016) – ScottMadden, Inc., one of North America’s leading energy consulting firms, released a [report](#) focused on fossil benchmarking. This report describes our approach for and the benefits of performing a benchmarking study.

With ever-increasing performance pressures on fossil units, operators will be required to do more with less. In the face of these challenges and myriad others, benchmarking is a critically important tool. This [report](#) outlines ScottMadden’s approach to fossil fleet benchmarking, which provides operators with the analytics needed to succeed.

“Benchmarking is a great managerial tool to compare your plant and unit results against others. ScottMadden understands the unique aspects of fossil generation design and carefully creates peer groups to ensure your comparison is as close to apples-to-apples as possible,” said [Todd Williams](#), partner and fossil practice co-leader at ScottMadden.

ScottMadden has assisted multiple utility companies to identify costs and improve reliability for fossil fleets in North America. Let us help you with conducting a benchmarking study and other fossil generation initiatives.
