

ScottMadden Joins Smart Electric Power Alliance to Host Webinar on Findings from the Executive Mission to Australia

ATLANTA, GA – (January 24, 2017) – To better understand the renewable transformation currently underway, the [Smart Electric Power Alliance \(SEPA\)](#) and ScottMadden, Inc., one of North America’s leading energy consulting firms, led a group of international energy industry executives to explore the renewable energy market in Australia. The trip included face-to-face meetings with industry experts and decision makers who are adapting to change in the region’s dynamic and challenging environment.

As a result of this trip, the team identified key learnings in three main areas: operational and technical issues, customers and stakeholders, and leadership. On Thursday, January 26, 2017, the energy executives from the mission will share their insights in a webinar titled, “Lessons from a DER Revolution – Findings from the Executive Mission to Australia.” This webinar will highlight the strategies and technologies being used to deploy DERs.

“The high penetration of distributed solar makes Australia an interesting and important case study for utilities in the United States,” said [Chris Vlahoplus](#), partner and clean tech & sustainability practice leader at ScottMadden.

To register for this webinar, please click [here](#). [Contact us](#) to schedule an interview with one of our thought leaders and learn more about our experience in the industry.

About ScottMadden’s Clean Tech & Sustainability

Leveraging our energy expertise, the ScottMadden Clean Tech & Sustainability practice helps our clients effectively navigate through the quickly changing energy landscape. We specialize in assisting our clients with sustainable energy strategies and making smart portfolio choices. We work with our clients to understand and effectively utilize cleaner, renewable sources of energy, such as nuclear, wind, solar, biomass, and biofuels. Our experienced team of energy practitioners understands the roles of energy efficiency, demand response, and storage as part of an integrated strategy. We also assist clients with sustainability, bringing an understanding of energy-unique concerns.

About ScottMadden, Inc.

ScottMadden is the management consulting firm that does what it takes to get it done right. Our practice areas include Energy, Clean Tech & Sustainability, Corporate & Shared Services, and Grid Transformation. We deliver a broad array of consulting services ranging from strategic planning through implementation across many industries, business units, and functions.
