

ScottMadden's Energy Industry Update Analyzes Evolving Federal Policy and the Impact on Wholesale Energy Infrastructure

ATLANTA, GA – (November 8, 2018) – ScottMadden, Inc., one of North America's leading management consulting firms specializing in energy, has released its latest edition of [The Energy Industry Update \(EIU\)](#). This issue of the EIU explores evolving federal policy toward wholesale energy infrastructure development, including emerging issues in power transmission and gas pipeline projects.

While there is significant electric transmission infrastructure planned, completing those projects is becoming even more difficult. Gas pipeline projects face opposition as well, as interest in greenhouse gas impacts and resistance to gas as a "bridge fuel" pose as hurdles to continued development. This [Update](#) addresses how utilities are responding to these recent trends.

"Stakeholders are actively participating at all levels of the regulatory process. Projects are facing increased regulatory, legal, and compliance costs, as well as longer lead times," comments Jennifer Nelson, director at ScottMadden.

If you were not able to join our [Energy Industry Update webcast](#), the complimentary recording is now available. Hear what our industry experts have to say about grid modernization, federal policy on wholesale energy infrastructure development, and industry views on efficient electrification in this session replay. You may also hear more of our original analysis in this [new video](#).

About ScottMadden's Energy Practice

We know energy from the ground up. Since 1983, we have served as energy consultants for hundreds of utilities, large and small, including all top 20 energy utilities. We have helped our clients develop strategies, improve operations, reorganize companies, and implement initiatives. Our broad and deep energy utility expertise is not theoretical—it is experience based.
